Fall-Sown Grass Seed Makes Best Lawns

Grass seed naturally self-sows itself in the Fall and germinates better at this time. An added advantage is that weeds being annuals are rapidly dying in the Fall, giving the grasses a better chance to become established. Next Summer the grass then strongly entrenched will make it hard for weeds to get started.

The roots of grass in the Fall go deeper on account of approaching Winter, giving greater permanence, too. Seeding can be done just as late in the Fall as the ground can be prepared and the seed sown, even if it may lie dormant until early Spring.

Fall is not only the best time to start a new lawn but also to renovate an old lawn. This is especially true of a lawn shaded by trees. There are several weeks in the Fall and again in the early Spring when no leaves are on the trees and the grass has a chance to gain good headway.

Fall seeding and fertilizing are sure to produce the ideal lawn.

BARR'S "SUNNYSIDE" Lawn Seed Mixture

This is a combination of the most desirable permanent grasses; dwarf, close growing, fine leaved, good color, lasting qualities. As the chief ingredient of a good lawn is superfine Kentucky Blue Grass there is a large proportion of this ideal grass in this mixture. No Timothy nor Rye nor coarse-bladed annual grasses are used to cheapen this mixture. It will germinate quickly and provide a neat, permanent lawn. Besides the Kentucky Blue Grass the other varieties included are fine-leaved perennial grasses and some Chewings Fescue, a higher priced grass that holds weeds in check much better than other varieties.

1 lb., 55c; 5 lbs., \$2.65; 10 lbs., \$5.00; 15 lbs., \$7.25; 25 lbs., \$11.75; 100 lbs., \$45.00; prepaid.

BARR'S "SHADY SIDE" Lawn Seed Mixture

Composed of shade loving permanent varieties of fineleaved grasses—no Timothy nor Ryegrass. Included are fine-leaved perennial grasses and varieties of grasses including Poa trivialis, which have proven best adapted for situations of a difficult nature due to shade.

Feed lawns under trees heavily three times a year—Spring, early Summer and Fall. Failure under trees is due more to competition of tree roots than shade, and plenty of feed gives both grass and trees a chance to exist.

1 lb., 60c; 5 lbs., \$2.85; 10 lbs., \$5.50; 15 lbs., \$8.00; 25 lbs., \$13.00; 100 lbs., \$50.00; prepaid.

BARR'S "GREEN MANTLE" Lawn Seed Mixture

This is a splendid mixture of good grasses for average conditions of soil and sunshine. It has a large proportion of Kentucky Blue Grass and other grasses for a good quick effect. Will give the lawn an enduring velvety, deep green mantle, with freedom from weeds, as it is very free from weed seeds.

1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.90; 15 lbs., \$4.25; 25 lbs., \$7.00; 100 lbs., \$27.00; prepaid.

PLANT TULIP BULBS THIS FALL FOR A GRAND DISPLAY NEXT SPRING

This year we again are able to offer Tulip lovers a select assortment of varieties in the various classes for Fall planting. We will supply nice, solid bulbs that will flower freely. They are large bulbs, averaging eleven centimeters in circumference (about 4½ inches). These are much larger and more free flowering than those ordinarily offered.

Varieties marked (D) dwarf; (M) medium; (T) tall.

Darwin Tulips

Most striking and beautiful as well as most popular of the Tulips are the gorgeous May flowering Darwin Tulips with their huge cup - shaped flowers in attractive clear colors.

The varieties here offered are considered best for outdoor use, having long stems and long lasting flowers.

	Doz.	100
Afterglow. Rosy-orange, salmon edges; inside deep orange	\$ 0.95	\$ 7.50
Bartigon. Fiery red, base white, edged blue; very good	.95	7.50
Clara Butt. Salmon-pink of perfect shape	.95	7.50
Farncombe Sanders. Fiery scarlet; inside vivid cerise-scarlet, with white base, marked blue	.95	7.50
Inglescomb Yellow. Large, bright yellow, well-formed flowers	.95	7.50
Pride of Haarlem. Old rose, enlivened with a scarlet sheen; most popular Darwin	.95	7.50
Zwanenburg. Pure white with black anthers; very beautiful	1.10	8.50
Barr's Rainbow Mixture Darwin Tulips. Includes a wide range of charming colors, representative of whole group, and varieties of		
uniform height for best effect	.85	7.00

Parrot Tulips

The petals of the beautiful and interesting late-flowering Parrot Tulips are curiously fringed or cut. The flowers are immense and very attractive by reason of the brilliant varied colors. Before it opens the flower resembles the neck of a parrot, hence its name.

	Doz.	100
Fantasy. (T) Salmon-rose, outside		
marked apple-green, Fantastically shaped petals, ragged edges	\$ 1.15	\$ 9.00
shaped petals, ragged edges	Ψ 1.10	4 0.00

Single Early Tulips

First of the Tulips to bloom. Widely used for formal beds and planting in gardens and borders. Give a glorious range of soft and brilliant colors in early Spring. They mature quickly and space can be used again for summer plants.

again for summer plants.	Doz.	100

Plant Barr's Evergreens Now to Enjoy This Winter and For Years to Come

Fall is an especially good time to plant Evergreens. They readily take root in the warm, moist earth, and all next winter you'll enjoy their fresh greenery.

When Spring comes and plant life starts to awaken the Fall-planted Evergreen will have already recovered from the transplanting operation and start growing with nature, gaining greatly over those planted later in the Spring. You stand to make a good gain by planting in the Fall. Some of our best plantings were done in the Fall.

Paramount Quality Furnished

Barr's "Will Grow" Evergreens are well-shaped, bushy, healthy plants, State inspected and officially certified as free of disease and insect pests. Each has been grown to greatest beauty attainable. Regular root pruning has provided a root system of great vitality and strength, giving power to assure successful growth when transplanted to your property. Barr's "Will Grow" Evergreens are guaranteed

Barr's "Will Grow" Evergreens are guaranteed to arrive in first-class condition. The large ball of Lancaster County's famous fertile soil inclosing the roots for protection will aid them in getting off to a good start in making continued successful growth.

HOW TO PLANT EVERGREENS

(1) Dig hole a foot larger and deeper than ball of earth.

B.&B. INCLUDED IN PRICE

All prices on Evergreens include digging with a ball of earth (B.&B.). Packing is also included on plants up to 4 ft. in size, but for larger Evergreens to be packed for shipment add 25c per ft. of height to cover cost of packing materials and labor.

All quotations are made F. O. B. Nurseries and subject to prior sale. Terms, net cash.

ADVANTAGES OF FALL PLANTING

It is now generally agreed by planting experts that Fall planted Evergreens, Trees, Shrubs, Peonies, Roses, etc. gain a year over spring planted stock. They start making their new roots as soon as planted.

This activity continues through much of the Winter even though the upper part of the plant is seemingly dormant. When Spring comes and sap begins again to ascend the plants have "their feet in the ground" and are ready to go ahead making sure and vigorous growth.

PLANTING AFTER A FREEZE

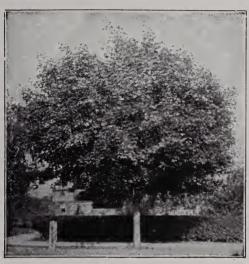

For late planting, which frequently is found necessary, put a heavy mulch of leaves or straw on planting site. This prevents freezing, or will draw out the frost already in the ground. Planting is then easy and the plants will have the opportunity of being ready to start growth as soon as Spring arrives.

SHADE AND ORNAMENTAL DECIDUOUS TREES

(Can be planted as late as December 20)

Does your home stand out in the bare sun, without background and unframed? Shade trees will make a wonderful transformation and give comforting shade as well.

Plant a tree—one with a future preferably. It pays to buy immediate effect—you have no waiting to realize results.

plants, 50c ea.; \$4.50 per doz.

HEDERA—ENGLISH IVY (see back cover page).
LONICERA japonica halliana — HALL CLIMBING
HONEYSUCKLE. Fragrant, yellowish-white flowers.
Potted plants, 35c ea.; \$3.50 per doz.

WISTERIA sinensis—CHINESE WISTERIA. Large
flower clusters. Blue or white (state preference). 2 yr.
grafted plants, 75c ea.

GROUND COVER PLANTS FOR DIFFICULT, SHADY PLACES

Under trees and on banks where it is impossible for grass to thrive Barr's offers a number of "Ground Cover Plants" that can be used for good results. 25 plants sell at the quoted 100 rate; 250 or more at the 1000 rate.

PACHYSANDRA

Under trees Pachysandra is the real answer to the problem of covering the bare ground with greenery. Another advantage is the protection to the roots of trees afforded by the Pachysandra. The glossy foliage is very attractive. Use 3 or 4 to 1 sq. ft. of the area to be covered.

	Per 100	Per 1000
1 yr. plants	 \$ 6.00	\$50.00
2 yr. plants	8.00	70.00

ENGLISH IVY

The English Ivy is particularly effective used on banks, to edge walks, and under trees. An advantage in using Barr's English Ivy is that it goes farther in coverage, each pot containing two plants—a two-fold advantage. Plant 10 to 12 inches apart and you will soon have a carpet of green.

	Ea.	Per 10	Per 100
2 1/4 in. pots\$		\$ 1.25	\$ 9.00
4 in. pots	.40	3.50	

(Large or Small-leaved)

PERIWINKLE

Not only is the Hardy Periwinkle a good ground cover under trees and on hillsides, but its pretty blue flowers also make an appeal. The glossy, evergreen foliage remains beautiful the year round. When planting do not place the crown of the plant below the surface of the soil. Use 3 or 4 to 1 sq. ft. of area.

	Per 100	Per 1000
Strong, field-grown plants	\$ 8.00	\$70.00

HONEYSUCKLE

Honeysuckle is a particularly attractive Ground Cover plant on account of dense coverage, and the fragrance of its flowers, which open white changing to yellow continuing midsummer to frost. Very fragrant. Plant 18 to 24 inches apart.

Potted plants, 35c ea.; \$3.50 per dozen.

Please let us quote you on Perennial Plants or other Nursery Stock you may want that are not listed in this Fall Supplement to our General Nursery Catalog, Quotations cheerfully given.
